Mrs. Thomas C. Harbison entertained the Wednesday Card Club at a Thanksgiving party last week at her home on West Main street. Evergreens and chrysanthemums were used as decorations. The candle-lit room with its log fire in the open fireplace formed a very pleasant contrast to the outdoor winter scene where the rime storm made Christmas trees of the hemlocks, balsams and shrubbery.

Mrs. E. R. Gilbert won high score prize and Mrs. Jack M. Hall the traveling prize.

A salad course carrying out the Thanksgiving motif was served at the conclusion of the game by the hostess assisted by members of the club. Favors were in keeping with the Thanksgiving season.

State College Issues New Bedding Pamphlet

Realizing that a clean, comfortable bed is a great aid to restful sleep, the State college extension service has issued a pamphlet entitled "The Clean Comfortable Bed." It is Extension Miscellaneous Pamphlet No. 44, and the publication is available free upon request by name and number to the Agricultural Editor, N. C. State college, Raleigh.

Miss Pauline E. Gordon, extension specialist in home management and house furnishings, and Miss Mamie N. Whisnant, assistant specialist in the same field, prepared the pamphlet.

Care of mattresses, pillows, blankets, and comforts is stressed, and since these bedding materials are used for a long period of time, it is recommended that they be kept clean by protectors that can be laundered easily. Another point emphasized is the size of the sheets.

"Nothing is more unpleasant than bedding that is too short or too narrow," Miss Gordon declares. "Short sheets are uncomfortable since they do not protect the blankets and mattress. Also, they wear out more rapidly because the sleeper is always jerking them."

The publication recommends that the bottom sheet be long enough to allow for a good tuck-in at the head and foot, so that the sheet will be smooth. The top sheet should allow for a good tuck-in at the foot and there should be about 18 inches to turn back over the blankets to keep them from coming in contact with the face, neck, shoulders and arms.

The sheet should be the length of the mattress, plus twice the thickness of the mattress (a total of 10 inches), plus a six-inch tuck-in at the head and foot (a total of 12 inches), plus 5 inches for the hems and 5 inches for shrinkage. Thus a mattress 76 inches in length would require a sheet 108 inches long.

C. D. Enloe Finds 48 Year-Old Egg

While re-roofing his home on upper Cartoogechaye, C. D. Enloe discovered a hen's egg, lying between the roof joists, which he calculates must be at least 48 years old.

Since the house has withstood the elements through the years under the original roof until recently, Mr. Enloe says the only possible way a hen could have gotten up there to lay the egg was while the house was being constructed in 1892. Only the shell of the egg remained, the contents having long since evaporated.
