

Russia

Anti-Tuberculosis

Russia Tuberculosis Seals are possibly the rarest of all TB Seals.
Many seals were only sold for a period of 3 days and these were not a highly collectable items
at the time in Russia.

Lugupeetud kodanik

Käesoleval ajal Tallinna Tuberkuloositõrje Dispanser teostab kogu Tallinna elanikkonna röntgenoloogilist läbivaatust, mis on väga oluline tuberkuloosi varajaseks avastamiseks. Õigeaegselt avastatud tuberkuloos allub hästi ravile.

Seoses sellega palume Teid ilmuda Tallinna Tuberkuloositõrje Dispanseri Uus Tatari 25, tuba 22 röntgenoloogiliseks uurimiseks

..... 196... aastal kl. 11.00—17.30.

Märkus: Isikud, kes on arvel tuberkuloositõrje dispanseris, läbivaatusele ei kuulu.

Уважаемый гражданин

Таллинский Противотуберкулезный Диспансер проводит рентгеновское обследование всего населения города Таллина. Это очень важно в целях выявления ранних форм туберкулеза, легко и полностью излечимых.

Надеемся, что Вы откликнитесь на наше предложение и явитесь в диспансер по ул. Уус Татари 25, комната № 22 для рентгеновского исследования 196... г. с. 11.00—17.30 часов.

Примечание: Если Вы в настоящее время состоите на учете в противотуберкулезном диспансере, Вы обследованию не подлежите.

«Kommunist». Tell. nr. 2899. 20 000. 1962.

Коняшинский санаторий имени Г. А. Маркова Бронницкого земства Московск. губ.

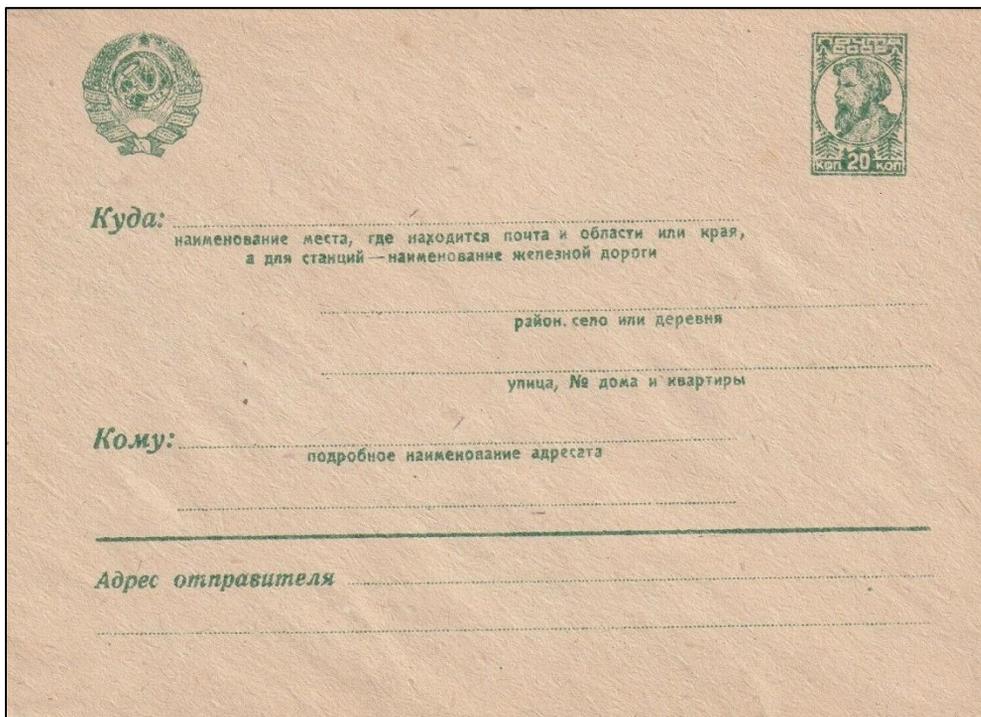

Борьба с туберкулезом в России составляет насущную потребность, направленную на оздоровление населения. Коняшинский санаторий осуществляет скромную попытку в этом направлении для жителей Желёзского фабрично-заводского района Московской губернии, где туберкулез имеет исключительное распространение. Санаторий был открыт в 1909 г. и по настоящее время через него прошло 214 больных туберкулезом.

Издание Бронницкого Отдела Лиги. 1913.
